

**NABINA**  
ALUMINIUM &  
GLASS FACTORY

## About us

Nabina Aluminium & Glass Factory is at the forefront of its sector in Qatar providing full glass solutions. Since its Establishment in 2000, the factory has been growing in terms of innovation and quality with having the most modern manufacturing facilities and adopting the latest technology.

The factory is capable of handling all operations related to glass whether it was artistic nor having designed patterns on glass or basic, like manufacturing windows, cabinets, and aluminum doors.

## Our Vision

Nabina aims to remain be recognized as a Top General Supplier in the field, besides enhancing the top technology currently used and keep on following the latest trends.

## Our Mission

To exceed each client's experience and expectations, along with building trust and turn any regular customers into loyal customers, is always our priority. We ensure to provide our competitively priced quality products matched within comparative service.

We make sure that our employees are always at their top performance. Accordingly, we hired the best-experienced individuals and enhance them by proving the latest technology trainings.

## Our Excellence

Nabina aluminum and glass factory has accomplished more than 500 projects from small residential projects to large commercial projects, providing various types of services. We present a variety of wide range samples and designs of glass in our showrooms and we apply glazing products and installation for the contractors and individuals.

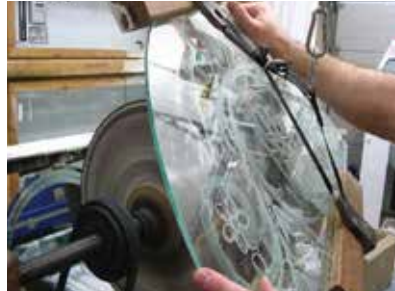

Our company has all the capabilities to do the full project cycle starting from project conception to project completion with keeping safety as our primary concern during all the phases.

Moreover, we have the “State of the Art” machinery that is a latest technology in the Glass industry. Along with .... At its finest.

## Fire rated steel & glass systems

In the event of fire and smoke, the FR system shall help occupants in quick evacuation from the building by providing 60,90 &120 minutes of fire rating. Damaging human life and properties can be avoided if proper fire-rated systems are installed in escape corridors, lift, lobbies, and basement car parking areas respectively.

Nabina aluminum & Glass Factory provides a high-quality fire-rated glazing system for fixed doors, windows, and partitions in various areas of the buildings. Our systems are third party tested, certified by International Certification Labs, and approved by Qatar Civil Defense (QCDD) for integrity (E), Integrity and Radiation Control (EW), and Integrity & Installation (IE)/requirements.

## Nabina Aluminium & Glass

We, at Nabina Aluminium and Glass Factory, provide one-stop solutions for customers in various industries, we focused on quality, accessibility, and delivery with International standards and have holistic design potential in Engineering, fabrication, and installation of complex interior architectural glass fit-out.

## UV Printing

Printing high quality images on different surfaces is not hard anymore, UV-printing is a printing mechanism on unconventional materials for interior decoration, arts and advertising.

Our Company owns a UV printer for professional production for a large volume of products. The printing width is 2500mm , height is 200mm and the length will be as per our customers requirments. Printing is available on various materials such as, mirrors, woods, roll materials, fiberboard, MDF, plexiglass, metal, concrete, composite panels, banners, canvas, plastic films, papers and many more.

We offer high level services with fast printing, Bright saturated colors, High level of resistant to sun rays and Environmental friendliness.

# UV Printing Process

## Embossed Design

Creating a touchiness masterpiece or Imitation of different kind of texture.

## Flat Design

Impresses the client by the high-resolution direct printing on top of any flat white or transparent surface.

## Stained Glass

High technological method with wide range of colors and design ideas to make a stained glass.

## One Face Flat Design & White Coated

This method allows printing on any colour surface, it can be used for printing on glass to make it non-transparent and one-side view only.

## Two Face Flat Design & White Coated

Both side view printing, where same design or two different designs can be printed on both.

## One Face Flat Design & White & Grey

One side view printing on transparent surface to hide what is behind the surface or the mounting materials.

# FABRICATING SOLUTIONS

We provide superior products with the power of our cutting-edge technologies.

## Acrylic

Due to the excellent resolution it produces UV printing on acrylic, is often used to create different types of signage, branding logos, and many other marketing products.

## Ceramic

There are several ways to print to ceramic materials including UV printing. Compared to an analog process, a digital process eliminates the cost involved in set up for screens or films, making turnaround time quicker and enabling short runs while maximizing revenue return. The digital process is also more creative and pleasing to the customer.

## Fabric And Canvas

We are one of few companies that provides Fabric and canvas UV printing. It takes ink beautifully and it is available in a variety of thicknesses to meet your exact specification requirements.

## Furniture

As people have different things that they love and treasure which are not easy to find readymade, we provide that service of printing on furniture. So, everyone can have the room they dream about.

## Glass And Mirrors

The technology of UV printing on glass and mirrors enables unlimited color combinations which makes it more unique than any other printing technology. Customer using this technology can have different images and patterns on glass partitions.

## Wood

UV printing on Wood is always faster than other methods, more flexible and always ensuring a high quality and durability. It can be in different shapes and thicknesses.
